

ICWEA consortium UN-WOMEN SWaSHE project draft Community Scorecard tools

- I. Name of the District: _____
- II. Name of the sub-county/Venue (where applicable): _____
- III. Participants-tick as appropriate:
- Women living with HIV (.....)
 - Female Sex Workers (.....)
 - Young people living with HIV (.....)
 - Men (.....)
- IV. Name of the facilitator _____ signature _____ Date _____
- V. Name of the supervisor _____ Signature _____ Date _____

Introduction: With financial support from UN Women, ICWEA in partnership with the Alliance of Women Advocating for Change (AWAC) and Uganda Network of Young People Living with HIV (UNYPA) is implementing a community scorecard in 18 districts in Uganda. The community scorecard (CsC) is aimed at building the body of evidence for use in promoting gender equality and women empowerment (GEWE), Sexual Reproductive Health Rights (SRHR) and ending violence against women and girls (VAW/G). The scope of the CsC includes:

1. Assessing knowledge levels of laws, policies and practices among women living HIV, young people living with HIV and female sex workers.
2. Assessing levels of engagement and participation in government programmes by women living HIV, young people living with HIV and female sex workers.
3. Assessing availability, knowledge and access to SRHR services and information among women, young people living with HIV and female sex workers

Additionally the evidence is expected to influence the on-going review the National anti-stigma policy, National Development Plan III, Adolescent Health Policy, National HIV strategic plan 2020- and adolescent health policy. The findings will be used to organize dialogues with the duty bearers to promote GEWE, SRHR and end SGBV/ VAWG.

1.0. CsC tool: VAW/G: - Selected Policies and legal frameworks to EVAW/G in communities

Performance Parameter	Very poor (1)	Poor (2)	Average (3)	Good (4)	Very good (5)	Reasons for the score	Recommendation(s)
1.1 Are you aware of any government activities about sensitizing women and girls on policies aimed at ending violence against women and girls?							
1.2. Are you involved in the monitoring and implementation of the above policy and legal frameworks							
1.3. Have you been consulted in the on-going review / design of the following? <ul style="list-style-type: none"> ▪ National anti-stigma policy ▪ National Development Plan III, ▪ Adolescent Health Policy, ▪ National HIV strategic plan 2020-2024 							
1.4. Are you aware of the any government hotlines (toll free lines) through which to address gender based violence or VAW/G							
1.5. Are you aware of the government programmes for							

Performance Parameter	Very poor (1)	Poor (2)	Average (3)	Good (4)	Very good (5)	Reasons for the score	Recommendation(s)
ending customary practices that promote GBV including child marriages in the communities?							
1.6. Are you aware of any laws or ordinances aimed at controlling the misuse of alcohol in communities to reduce GBV in this community?							
1.7. Are you aware if there are available of government school interventions aimed at ending VAW/G in communities?							
1.8. Is there infrastructure (shelter) for GBV survivors/victims in these communities?							

2.0. CsC tool: - Policies and programmes promoting GEWE at community level

Performance Parameters	Very poor (1)	Poor (2)	Average (3)	Good (4)	Very good (5)	Reasons for the score	Recommendations(s)
2.1. Are you aware of government gender-equitable, property and resource ownership policies that enable women living HIV, young people living with HIV and female sex workers to manage them							

Performance Parameters	Very poor (1)	Poor (2)	Average (3)	Good (4)	Very good (5)	Reasons for the score	Recommendations(s)
(resources at their disposal) in a more sustainable manner?							
2.2. Do you know any government programs aimed at greater economic independence of women living HIV, young people living with HIV and female sex workers meant to increase ability to negotiate safe sex and more awareness of challenges around traditional norms in sexual relations for preventing the spread of HIV/AIDS and other epidemics?							
2.3. Are you aware if there are government trainings including life skills and vocational skills aimed at empowering women living HIV, young people living with HIV and female sex workers to increase access to decent employment?							
2.4. Are you aware of safer spaces and mentorship programs that the government of Uganda has put in place to empower women living HIV, young people living with HIV and female sex workers?							
2.5. Are you aware of government programmes, policies and interventions supporting inheritance and asset ownership by widows and daughters including women living HIV, young people living with HIV and female sex workers?							

Performance Parameters	Very poor (1)	Poor (2)	Average (3)	Good (4)	Very good (5)	Reasons for the score	Recommendations(s)
2.6. Are you aware of the government programs aimed at increasing access to land incomes for women living HIV, young people living with HIV and female sex workers through better land management?							
2.7. Are you aware of government programs promoting women participation in civic spaces, political seats and representation (including women living HIV, young people living with HIV and female sex workers)?							

3.0 CsC tool: - Policies and programmes promoting SRHR at community level (Human Rights and indicative state obligations underpinning sexual and reproductive health (as set out in human rights norms and by United Nations Treaty Bodies)

Performance Parameters	Very poor (1)	Poor (2)	Average (3)	Good (4)	Very good (5)	Reasons for the score	Recommendations (s)
3.1. Is the government of Uganda (public health facilities) ensuring that FP services are fully integrated and readily available and accessible in clinics and reproductive health and other health services, allowing choice from the full range of quality modern contraceptive methods?							
3.2. Is the Government of Uganda (public health facilities) providing accurate and comprehensive SRHR information,							

Performance Parameters	Very poor (1)	Poor (2)	Average (3)	Good (4)	Very good (5)	Reasons for the score	Recommendations (s)
particularly on FP and modern contraception?							
3.3. Is the revision of contraceptive services in public health facilities (including but not limited to sterilization) being done based on full and informed consent of the beneficiaries?							
3.4. Is the government prohibiting and punishing all forms of coercive and forced contraceptive practices, including but not limited to sterilization?							
3.5. Has the government set up programmes that address financial barriers, such as insurance coverage and other budgetary and economic measures to make contraceptive products and services affordable, especially for people with lower incomes and those living in poverty and extreme poverty?							
Summary of standards for adolescent health - Uganda (2012)/ Key standards							
3.6. Are all adolescents able to obtain SRH and rights information and advice relevant to their needs, circumstances and stage of development?							
3.7. Are all adolescents able to obtain SRH services that include preventive, promotive, rehabilitative and curative services that are appropriate to their needs?							

Performance Parameters	Very poor (1)	Poor (2)	Average (3)	Good (4)	Very good (5)	Reasons for the score	Recommendations (s)
3.8. Are service providers in all delivery points have the required knowledge, skills and positive attitudes to provide SRH services to adolescents effectively and in a friendly manner?							
3.9. Are adolescents aware of government policies and management systems are in place in all service delivery points that support the provision of adolescent friendly SRH services?							
3.10. Are all government service delivery points organized for the provision of adolescent friendly SRH services (ADFHS)							
3.11. Are adolescents encouraged to participate in monitoring and evaluating delivery of ADFHS in government facilities?							
3.12. Do you know any government mechanisms in place for enhancing community and parent to ensure adolescents have access to SRH services?
